Pocket Testers

pH, Conductivity, TDS & Temperature

Delivering simplicity and affordability through innovation.

The DTK range of pocket waterproof testers to IP-57 will float in water and give you the flexibility to monitor water conditions in rugged conditions.

The pH1 uses the unique flat electrode which means it is very robust. It displays pH and temperature simultaneously along with the battery life. It will read from -2 to 16.00 at a resolution of 0.01pH and has ATC. The unit only weighs 150 gms and has auto shut off. The pH1 can also be used with the RE1P probe to allow the meter to measure redox in mV from -1000 to 1000 mV.

The EC1 displays Conductivity, TDS or Salt with temperature. Temperature measurement is from 0 to 90°C, Conductivity in the range of 0 to 20,000 mS & TDS is from 0 to 13.00 ppt. The meter has ATC, will auto shut off after 10 minutes of non use and has a data hold function. It also displays battery life and weighs only 150 gms.

Calibration Service

Each meter is supplied with a factory calibrated certificate which is valid for 12 months.

All types of meters can be sent to our laboratory for an annual calibration which is valid for 12 months.

Unique flat electrode which is very robust & almost unbreakable.

Options :

- EC1 - Conductivity/TDS/Temperature Meter
- pH1 - pH/Temperature Meter
- pH1R - pH meter with redox probe reading mV
- EC1P - Replacement Conductivity probe
- pH1P - Replacement pH probe
- RE1P - Replacement redox probe

Call us for more information.
