Temperature Monitoring

For Legionella Compliance

Delivering simplicity and affordability through innovation.

The DTK range of Thermometers give you the flexibility to monitor water and surface temperatures in the most practical way for your application.

The EA11A has a large screen for easy viewing and will store up to 150 readings. It operates in the range of -50 to 1300°C and comes with a built in stand and protective holster. It is also supplied with a K type bead wire probe, K type penetration probe and K type surface contact probe.

The 42515 allows the accurate measurement of virtually any surface in the range of -50 to 800°C and will store up to 20 readings. It has a large LCD display with a built in laser pointer for improved aim. The 42515 will also take any K type probe making it very versatile.

The 39240 is a pocket sized thermometer which is fully waterproof. It weighs only 20gms and is the ideal tool for accurate measurement of water temperatures operating in the range of -40 to 200°C.

Calibration Service

Each meter is supplied with a factory calibrated certificate which is valid for 12 months.

All types of meters can be sent to our laboratory for an annual calibration which is valid for 12 months.

Temperature Monitoring Options :

EA11A K type thermometer
42515 IR Thermometer with K type input
39240 Waterproof Pocket Thermometer
K type Penetration Probe
K type Contact Probe
